DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a method for isolating genes involved in the determination of a trait or phenotype of plant species, and to a method for isolating essential genes in a plant, classifiable in for example 435/6, and 800/295.
- II. Claim 32-52, drawn to a method for introducing inhibitory RNA in the cytoplasm of plant cells and a kit for practicing said method, classifiable in for example 536/24.5, and 435/419.

2. The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I and II differ in the method objectives, method steps, parameters, and/or in the reagents used. Due to the differences in the methods represented by the above groups, each group represents a patentably distinct invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1635

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
